

VEHICLES MOBILITY IS OUR BUSINESS

Established in 1988, Tamor employs a variety of in-house production technologies:

- Metal fabricating, any way required – machining, forming, welding, cutting and stamping.
- Rubber vulcanization – rubber molded items, especially rubber bonded to metal parts.

We produce:

- Track shoe assemblies for tanks, earth moving, asphalt paving and other equipment.
- Wheels for armored vehicles, trucks and forklifts.
- Chassis, frame and suspension parts and assemblies.
- Fuel and water tanks for vehicles.
- Shear mounts and vibration dampening pads for the Metro, trains, engines and submarines.

ISO 9001 and AQAP-110 approved, Tamor is proud to be among the few certified by the US Tank Automotive Command (TACOM), as a Qualified Supplier – listed on TACOM QSL (Qualified Supplier List) 01, QSL 03 and QSL 04.
